People Operations Database of a Small Businesses

GROUP RED

The people operation database has seven tables:

1. The workforce table stores the data of employees.
2. The position table stores the job data including job title and salary range.
3. The division table stores department data.
4. The nominee table stores the employee's dependents.
5. The site table stores the location of the departments of the company.
6. The country table stores the data of countries where the company is doing business.
7. The area table stores the data of regions such as Asia, Europe, America, and the Middle East and Africa. The countries are grouped into regions.

Table	Rows (Yet to be decided)
workforce	
position	
division	
nominee	
site	
country	
area	

Plan: 1) project will be completed before November 13

2) creating a database of almost 10,000 entities by Shiva and Nitin

3) establish connection between the mentioned tables below in the pictures using joins by Abbas and Srikar.

4) further processing of the project is yet to be finalized and will update once it is done.
